

Brown's Gas®

Committed to
the Global Application
of Molecular Hydrogen

BYT-EU-H03

Hydrogen/Oxygen
Generator with Nebulizer
For Medical Centres

Hydrogen
66%
Oxygen
33%

Software functions:

1. Adopting fingerprint identification technology to make accurate record of the identity of the user realized.
2. Equipped with Wi-Fi & Bluetooth, as well as APP, to achieve remote control.
3. Available for external wearable physiological index indicators to achieve the dynamic collection and management of health data.
4. By way of the cloud platform to make all families consult doctors online for health advice.
5. Interacting with the hospital data platform to achieve remote management of patients, optimizing the medical program.
6. Taking advantage of APP and ERP to assist the distributors to achieve a systematic operation management, e.g., capital flow and information flow.
7. Remote intelligent monitoring of the machine's running state to achieve integrated services of faults and maintenance.

Machine functions: Automatic disinfection, drug delivery by atomization, automatic feedwater, mute, oxygen carrying function, production of hydrogen-rich water, 24-hour continuous operation, detection of fault power ground, automatic alarm when functioning abnormally, free from electrolyte.

Power Supply (V/Hz)	AC100~240 / 50~60	Fluid amount of atomization (mL)	10
Power rating (VA)	1000	Size: L ×W ×H (mm)	470 × 240 × 490
Atomization quantity (mL/H)	≥ 30	Net Weight (Kg)	18
Gas Production Rate (L/min)	2.0/2.5/3.0(Adjustable)	Water-quality requirement	Purified water or distilled water.
Guarantee period	5000h or 2 years, whichever comes first will prevail. Lifelong maintenance.
